SUMMARY

Systems architect across physical and digital products. Thirty years clinical. Built a product line seed-to-shelf, redesigned care-team workflow and compensation across a multi-site dental group, and now own a five-surface health platform end to end - discovery, roadmap, authorization model, interface, and the contracts underneath. The constant is designing systems people have to trust with something that matters to them.

SKILLS

Product discovery and roadmapping | requirements and success metrics | cross-functional delivery | 0-to-1

Front end React | TypeScript | design systems | Storybook | tokens and variants | accessibility (WCAG AA)

Decentralized Solidity | Hardhat | ERC-20 and ERC-721 | on-chain consent and attestation | EIP-6963 wallet integration | Merkle proofs | IPFS

Data SQL | Python | Pandas | R | Tableau | Jupyter | schema design | ETL

Health systems HL7 | FHIR | OMOP | EHR mapping | clinical workflow design

Clinical systems Dentrix | Denticon | Eaglesoft | Open Dental | MacPractice | Archy | tab32 | SoftDent

EXPERIENCE

Founder & Product Lead - Future Systems Lab LLC 2023 - Present

Own product strategy and delivery for a hybrid on-chain/off-chain health platform where participants hold their own credentials. Shipped the consent and authorization layer, the session and identity model, and the React/TypeScript design system all five surfaces are built from. Eleven contracts authored, deployed, and source-verified on Ethereum Sepolia - ten current, one superseded. Defined the roadmap, wrote the requirements, ran the security audit.

Practice Operations Lead & Clinical Lead - Riccobene Associates Family Dentistry 2019 - 2025

Redesigned clinical workflow and the hygiene compensation model across one of the largest US dental service organizations. Per-provider production \$380,710 to \$624,640 annualized, a 64% increase across four documented years; department share of office production 30.4% to 38.1%.

Founder & Clinical Director - SunCodes Holistic Health 2018 - 2023

Owned a product line end to end - formulation, packaging and label design, third-party lab testing, batch compliance, retail buildout - then moved it direct-to-consumer in 2020.
